Enclosed in this packet are reference materials we hope you find helpful:

- **ID Card:** Keep your new ID cards in a secure place. You will need to present this new ID card to your pharmacy on or after May 1st, 2024, to obtain your benefits for covered prescription drugs.
- **Brochure:** The brochure includes a brief benefit overview, information that may help save you money on your medication, information on our patient portal, and information on how to obtain your prescriptions.
- **Formulary:** The formulary is a list of commonly prescribed medications determined to be the most cost and clinically effective in each therapeutic class. While the medications listed are not the only ones available for dispensing, it is recommended physicians consider these brands and generics for most of their prescribing activity, subject to their professional medical judgment, as they have been deemed the preferred agents within their respective therapeutic classes.

It is important that you present your new ID card to receive your full benefits. Using your card every time you purchase a prescription medication will ensure that you will pay only your copayment for your prescriptions.

For long-term medications, the Sav-Rx Mail Order Pharmacy is cost effective and allows you convenient home delivery. Your mail order prescriptions will be shipped directly to your home or office, with no shipping charge. To get started, simply call Sav-Rx toll-free at **(800) 228-3108** with your current prescriptions as well as your physician contact information.

Call Sav-Rx at **(800) 228-3108** with any questions concerning your prescription benefits. You will receive personalized, professional assistance from a LIVE Union representative 24 hours a day, 7 days a week, 365 days a year. We look forward to assisting you with all your prescription needs.
